

Summary of implementation status 2023:

Country	Status	Other remarks
Denmark	Chart datum in practice close to EVRS-based chart datum (DVR90).	Will follow the Swedish approach and implement BSCD2000 when Sweden do in waters close to Denmark.
Estonia	All decisions are taken and the implementation is ongoing. Used in charts and water level information from 2018-01-01. Water level presented both in BK77 and EH2000/BSCD2000. The changes is up to 30 cm in new charts.	Levelling for national height system has been finalized. Data in depth database will be transformed. New charts with the new reference will be produced continuously, The first charts have been produced in 2018 and and so far the following has been completed: 17 harbour ENC-s, 75 berthing ENC-s, 10 harbour paper charts , 11 berthing paper charts and 2 chart album that contains charts from two height systems. Notices to Mariners 2022-12-01 . Info Sheet . Web application Nutimeri displays Estonian Transport Administration's official electronic navigational charts.
Finland	Ongoing. All decisions are taken already in 2008 and 2015. Approach charts from Tornio to Vaasa have been published. The publication status of N2000 charts and Finnish nautical charts portfolio .	Finnish Meteorological Institute (FMI) provides water level information in both systems (MSL and N2000/BSCD2000). Differences between MSL and N2000/BSDC2000 are provided as a table . Sea level observations and forecasts will be available in N2000/BSCD2000 for the public simultaneously with Traficom nautical charts. New video about the N2000 fairway and nautical chart reform.
Germany	EVRS realization in use in practice. The vertical chart datum of BSCD2000 is close to the national height system of Germany (ETRS1989+DHHN2016). All published products will refer to this datum. In August 2021, BSCD2000 was officially introduced as chart datum for German waters in the Baltic Sea.	The database refers to national height system. The official introduction was decreed in January 2018 and is binding for all institutions coming under the jurisdiction of the Federal Waterways and Shipping Administration (WSV). Information about the new reference .
Latvia	Decisions has been done in middle 2020 and implementation continues. New national height system LAS2000,5 (EVRS-based) into use in 2015. LAS-2000,5 to new editions of charts in a following sequence – harbour charts, coastal charts, general charts. Harbour charts are either already implemented to BSCD, LAS-2000,5 or they are in progress.	BAS77 still used. Differences between BAS77 and Baltic Sea Chart Datum 2000 is well known and can be accessed by web-application and info in all nautical charts how to transform depths to BSCD2000. Details regarding depth conversion to BSCD2000 are given in chart notes.
Lithuania	National height system LAS07 (EVRS-based) came into force 2016-01-01.	BHS-77 still used. The difference between BHS-77 and LAS07 is well known (about 13 cm) and is also written in nautical charts. Tide gauges in Lithuania belongs to the Lithuanian Hydrometeorological Service. Data from tide gauges are presented in BHS-77.
Poland	A written decision was issued by HOPN in July 2021 - Guidelines and timetable for the implementation of PL-EVRF2007-NH (BSCD2000). Bathymetric measurements collected in the bathymetric database were transferred to the vertical reference system PL-EVRF2007-NH. In 2021, gravimetric measurements in Polish waters were completed. September 2021 - information campaign about a new chart datum. 2021 – 2023 new editions of all INT harbour, approach and coastal charts.	Local datum Amsterdam NN55still in use. Poland have an legal act about reference systems, which allows to use other than PL-EVRF2007-NH datum until 2023. Institute of Meteorology and Water Management (IMWM) runs the Polish water level stations. The difference between the local datum and PL-EVRF2007-NH (BSCD2000) is less than 9 cm.
Russia		
Sweden	Ongoing. All decisions are taken. Many charts already published. Implementation is a part of the "Chart Improvement Project", to be concluded at the latest in 2030. . All water level information is related to RH2000/BSCD2000, since 2019-06-03.	Cooperation with SMHI on water level information. The difference between mean sea level (MSL) and BSCD2000 at the water level stations are presented in this table . Information compaigns is ongoing for ports, pilots and other interested parties. Notices to Mariners 2019-05-15 . Several articles written in magazines and on webpages. Info Sheet about BSCD2000 from SMA/SMHI .
