

NSHC Tidal Working Group

Johan Verstraeten

Belgian Hydrographic Office

7 February 2023

Study project

- Update of the Belgian LAT surface
- Ghent University Geomatics Department
- Start : March 2023
- Running time 24 Months

LAT in the wild

Regained popularity for :

- Results from Blast project (2009-2012)
- Danish DNSC08 (maybe related to Blast)

Other users :

- Coast-to-coast LAT surfaces for cable trajectories
- local interpretations in smaller local areas : Wind Farms

Difference range compared to BEHO LAT : 1dm – 6dm.
